MINING, BUSINESS AND STOCKS

MAY DAY AND NEW YORK BON

Furnished the Features of Forenoon Trading on the Mining Exchange.

BUTLER-LIBERAL WAS WEAKER

Uncle Sam Con. Sold Down-Carisa Called for-Closing Quotations And Sales.

The features of the forenoon trading on the floor of the Salt Lake Stock & Mining exchange were furnished by May Day and New York Bonanza. Both were active and stronger. May Day started off at 25 cents, and closed a half cent higher. New York fluctuated but little, holding steady around 59 and 60 cents. Butler-Liberal displayed signs of weakness, while Sacramento sold down to 716 cents. Daly-West was quoted slightly stronger, while Daly-Judge was not offered at all. Carlsa sold at 11% and 12 on the open board, while Uncle Sam Con. sold down to 34%. The closing quotations and sales were

INVESTIGATION STARTED Against Standard Oil Company in Kan-

sas by Commissioner Garfield.

Topeka, Kan., April 12.-J. R. Garfield, commissioner of corporations, started his work of investigating the Standard Oil company in Kansas yesterday. Three special agents of the department are here with Mr. Gar-field. They are going through the rec-ords in the office of the secretary of state, gathering data concerning the various oil companies doing business u the state. Charles Earl, one of the agents, held a conference with Gov. Hoch this afternoon, at which various methods of securing information were touched upon.

Commissioner Garfied has arranged to meet United States District Attorney Dean, when they will have a prolonged conference, Mr. Dean has received certain orders from the deprolonged conference. Mr. Dean has received certain orders from the department of justice in regard to the ledge was broken into.

oil fight which he will not divulge. Th federal grand jury is also in session here at this time. It is thought to be the intention of the officials to bring some of the evidence before the grand jury, but the officers refuse to discuss the matter in any way

MR. ROOKLIDGE NAMED. Well Known Citizen Made Manager of

The Piencer Sampler.

Late yesterday afternoon the announcement was made by President S. L. Butler of the Pioncer Sampling company that he had appointed Charles D. Rooklidge as general manager of the company's affairs. The selection is a good one and will undoubtedly meet the approval of a large clientge of ore shippers. Mr. Rooklidge is a mining man of wide experience and, combined with his knowledge of the sampling business, is especially fitted for the position which he has accepted with the Pioncer. He was for several years in charge of the Macintosh sampling plant at Park City, prior to taking up his residence in this city. The Piencer Sampler.

BREAK IN TONOPAH'S.

Stocks Suffered a Bear Raid on San

Francisco Exchange Today. There was a big break in Tonopah stocks on the San Francisco Stock Exchange today and the whole list was more or less affected. North Star, Montaga-Tonopah, Tonopah Belmont, Tonopah, Tonopah Midway and Sandstorm being particularly weaker. The cause of the break is not explained, but is believed to be a bear raid. James A. Poliock & Co., brokers, fur-

ORE IN THE TETRO. Good Showing on the Fifty and One Hundred Level.

Advices received from Tintic during the forencen brought the information that ore is beginning to show in the drifts being run on the 50 and 100 foot

The strike made last year was on what is known as the tunnel level and the levels now being run are below it.

IN EAGLE & BLUE BELL. Some Big Ore Bodies Being Developed in

This Tintic Mine. The mangagement of the Bingham Consolidated is developing some fine ore in the Eagle & Blue Bell mine in ore in the Eagle & Blue Bell line in Tintic. It is reported that a 30-foot vein has been opened, which shows val-ues of \$26 to the ton. On the 800, where the principal operations have been con-centrated, the company is taking out ore that averages \$14 to the ton.

NEW YORK BONANZA.

Some Ninety Ounce Silver Ore Encountered in Park City Mine.

An arirval from Park City last night stated during the day that when be left camp it was current talk that the cross-cut from the 800 level of the New York Bonanza had encounted the ex-pected ore body. This is believed to be irue. The stock stiffened considerable today and, as the quotations will show, was fairly active.

BE FOUND IN UTAH

Importance of the Work Recently Undertaken by United States Geological Survey.

RARE METAL HAS VALUE OF \$21

Per Ounce-Circular Issued by Directer Wolcott-What is to be Done At Portland Exposition.

Victor C. Heikes, who is in charge of the mineral resource work of the United States Geological survey for the states of Utah and Idaho and territory of Arizona, is confident that, as a result of the plans mapped out for an examination into the platinum resources of the United States, that valuable metal will be found in possibly commercial quantities in Utah. Since the announcement of the survey's intention several weeks ago, Mr. Helkes has received numerous inquiries and has already forwarded a large lot of samples ds on to Washington, D. C., for sampling, etc.

There is an increased demand for platinum and it has a market value at the present time of about \$21 per ounce. Pure platinum is a silvery white metal with a specific gravity of 21.5. It is the heaviest metal in nature with the exception of iridosmium. It is almost as hard as iron and very malleable. most as hard as iron and very malicable. It does not amalgamate with quick-silver, is not dissolved by potassium cyanide when cold, is not attacked by acids, except the mixture of nitric acid and hydro-chloric acid known as aqua regia. It is more difficult to melt than gold. Native platinum has been found most frequently in gold bearing sands. On account of its weight it remains in the sluices with gold and other heavy material. Platinum is most readily distinguished as follows: (1) By its great weight—in panning it remains behind even gold in the pan; (2) its white color—it is whiter than lead and is distinguished from amalgam by its smooth surface, whereas the and is distinguished from amalgam by its smooth surface, whereas the surface of amalgam, as seen under a good glass, is rough; (3) its resistance to nitric acid, as compared with native silver or lead. Native platinum is usually very impure; occasionally, it contains so much iron, chromite, and other impurities as to be dark in color and not easily distinguished from grains of chromite with which it is very frequently associated. It often contains iridosmine, which occurs as flat angular scales, while platinum grains are smaller than gold grains. Large nuggets are very rare.

For the information of prospectors and others interested in the subject, Charles D. Wolcott, director of the survey has issued the following cir-

survey has issued the following cir-

"On account of the increased demand r platinum, it is the intention of this survey to make an examination of the platinum resources of the United States. It is proposed to collect the heavy sands from all placer mines in the United States, where evidence of platinum has been found by prelimin-ary tests. The samples thus obtained will be used in determining the best methods of extracting the various minerals which have economic value, is hoped that, in many places, separation and sale of these useful minerals, such as magnetite, chromite, garnet, monazite, rutile, topaz, zircon, gold, platinum, iridosmine. become a permanent and profitable in-

"As a preliminary step in this in vestigation, you are cordially invited to mail to this office not more than four pounds of material most likely to contain platinum in your placer de-posit. This material will be carefully examined, and you will be duly noti-fied of the results. It is suggested that you concentrate the gravel as well as you can before mailing it, care being taken not to lose any heavy material. You should carefully note of the package, or in a letter accompany-ing it, or both, the total quantity of original gravel which your concentrate represents, in order that a general idea may be obtained of the value of your gravel for the purposes under inves-

'After an examination of these preliminary samples, experts will be sent to all localities where preliminary tests to all localities where preliminary tests give promise of platinum in profitable quantity. The expert will report on the size of the deposit and superintend the collection of representative samples for concentration. Concentration experiments will probably be carried out in connection with the exhibits of mining machinery at the Lewis and Clark Centennial at Portland, Or., between June 1 and Oct. 15 of this year. "I shall appreciate all information which you can give as to the efforts previously made to separate platinum from your sand, or from other sands in your neighborhood, and as to the quantity of platinum produced in your your neighborhood, and as to the quantity of platinum produced in your district. Each package of sand should be accompanied by exact information as to the name and postoffice address of the sender, the name of the mine or claim from which it came, and the state, county, city, village, or district in which the deposit is located.

"Great care should be used to pack the sand securely for transmission through the mails. It is preferable to sew up the sand tightly in a canvas bag, and tie the tag, which requires no postage, carefully to the package. The sand should be dry when mailed.

Don't make good bread. It's the housewife who uses Smith's Flour that

MAKES COOD BREAD. . .

On request, additional postal franks will be sent to you. No specimens will be examined unless the above informa-tion is given in regard to the exact locality from which the samples have been obtained. The accompanying in-

been obtained. The accompanying information in regard to platinum may
be of interest to prospectors."

Dr. David T. Day, chief division of
mineral resources of the survey, passed
through the city a few days ago enroute east from Portland, Or., where
he arranged for the construction of a
building at the Lewis & Clark exposition, 60x100 feet, in which will be shown
various ere dressing machines and devices. The machinery houses of the
coast and particularly of San Franeisco, are greatly elated over the prospect of having the opportunity to show
their lines of concentrators. Arrangetents I ave seen nade with the railroad companies to transport machinery for this exhibit free of charge and,
in fact, there will be no expense for
the exhibitors to bear, except the electrical energy required in operation. In
the building trical energy required in operation. In this building the government will con-duct experiments with platinum bear-ing sands, and each concentrator there will be given an opportunity to demon-strate what it can do.

UTAH COPP R EXPANDS.

Calls for More Office Space in McCor nick Block.

The Utah Copper company's demand for additional office space in the McCorfor additional office space in the McCornick bank block has caused considerable shifting about among the tenants. The Utah Copper now has seven rooms contiguous on the sixth floor, but Manager D. C. Jackling finds it necessary to have two more in order to accomodate the engineering department while the new works to be put up near Garfield Beach, the new railroad to Bingham, etc., are in the course of construction.

only the preliminary work in connection with the building of the new works has been undertaken, but as soon as the engineering department establishes itself, the plans for the various buildings will be drawn and hurried to completion as rapidly as possible. as rapidly as possib

AT THE DEER LODGE.

Behavior of New Machinery Pleases Management of Mine.

E. B. Andrews of the Lodge Mining company's properties in Lincoln county, Nev., has arrived from camp, and reports that the new machinery recently placed in commission is moving satisfactorily.

The company is running a tunnel to open its ore bodies. The first ledge, it is claimed, will be encountered at

BINGHAM OPTION.

Property Adjoining Utah Copper Tied Up By J. A. Hogle Jr.

James A. Hogle, Jr., who recently secured an option on the Starius and Horseshoe groups, adjoining the Utah Copper company's ground in Bingham, it was learned during the day, is about to make a turn to an eastern syndicate. The price was not disclosed. Being so favorably located the property ought to go at a good stiff figure and it probably will. The fate of the deal will be determined next week.

NOW IN COMMISSION.

Rough Edges Being Worn Off Continental-Alta Mill and Tram.

Manager Henry M. Crowther of the Continental Alta came down from camp last night and reports that adjustments are being slowly made in the tramway and mill. Both are in commission, but it will be some little time before everything is in perfect run-

The late storm was quite severe in Alta and the snow piled up at least two feet. Although the Salt Lake valley was wind-swept. Mr. Crowther says comparative calmiess prevailed in the Little Cottonwood canyon.

CARBONATE HILL. Officers Will Arrive This Week to Inspect Property.

Within the next day or two several officers and the principal shareholders in the Carbonate Hill company, which owns a large group of claims in Weber canyon, will arrive from Butte, and, in company with Manager Matt Dougherty, will visit the property on an inspection trip and determine on a policy to be carried out in the future. In the party will be James Finlen of Butte, Charles Kelley and John M. Dougherty of Omaha, who have lately disposed of their interests in the great Speculator mine in Butte. peculator mine in Eutte. Mr. J. M. Dougherty is a brother to

Manager Dougherty. Albion Development.

Manager William Hatfield of the Albion mine at Alta says development work is being pushed forward with vigor and that considerable ore is showing in the tunnel; but the main body has not been reached.

CONCENTRATES.

W. W. Armstrong departed for the Frank J. Westcott is looking over the conders of the Cactus mine and mill at

Manager E. W. Clark of the Ophir-Hill mine and mill at Ophir was in the city last evening.

Edmund H. Mead has accepted a po-dtion with a well known Goldfield Mining company, Last week, at the Daly-West mill in

Park City, 402 tons of second class ore as reduced to concentrates. A new hoist is to be installed at the Silver King Con. mine at Park City and he shaft, now 800 feet deep, continued

Charles Morrison is in the city from the Indian Queen property in Beaver county, where he says work is progress-

The ore and bullion settlements reported for McCornick & Co. late yester-day were as follows: Crude ore and concentrates, \$31,200; base bullion, \$33,-

Solon Spiro, manager of the Little

Beil and Silver King Con. mines at Park City, who, with Mrs. Spiro, spent the winter in southern California, re-turned to the city yesterday.

The vein encountered recently in the Annie Laurie Extension mine in the Gold Mountain district has been crosscut for a distance of 18 feet, with no indication of the hanging wail.

As was expected they would do, the directors of the Grand Central Mining company met in Provo yesterday and posted a dividend of \$12,500, which is payable to stockholders of record on

AMONG STOCKS

Market Open With Majority Higher But There Was a Sprinkling of Losses.

SMELTING A CREAT FEATURE

Undertone Improved on Renewal Bull Manipulation of It and Other Metals.

New York, April 12.-There was prinkling of losses in the opening dealingsteday, but the majority of stocks were higher. Some of the wavering characteristics which distinguished yesterday's market existed, but the movement was much circumscribed. Illinois Central feit the realizing on its sensational rise of yesterday, and the grangers and metal stocks swung both ways on a narrow range. Considerable Kansas & Texas preferred was bought at an advance of 2 points and the common gained 1. Himois Central recovered its point loss. Union Pacific, Smelting, Locometive, Cotton Oil, Biscuit and Alips-Chalmers preferred advanced 1. Chicago Great Western preferred 2, and Locomotive preferred 24. The market was dull and hesitating at 11 o'clock. The market became more active and made wider moves, but the tone centinued feverish. There was a sharp brenk which carried prices generally below last night, but was followed by a brisk rally. New York Central receded 1%, Illinois Central 1½ and People's Gas 2. Other declines were Minneap-lis, St. Paul and Sault Ste Marie 1½, the preferred 2½, Westinghouse Electric 2, Colorado Fuel 2½, and Tennessee Coal, Sugar, Realty, Chicago Union Traction, Hocking Valley, Delaware & Hudson and Chicago & Alion preferred 1 to 1½. The market was unsettled at noon rally.

Bonds were heavy at noon.

The undertone of the market improved on a renewal of the bull manipulation in Smelting and other metal stocks. Raliroads did not benefit much and trading in them was restricted to a few leaders. Smelting was run up 4 point, the preferred to 1 to 1½. Tennessee Coal more than recovered its forenoon break and New York Central got back to above 15. Federal Mining dropped 6½, and General Electric and New York Chicago & St. Louis and the second preferred 1 to 1½. The sustained demand for Union Pacific at an advance of 1½ and a jump of 1½ in United States Steel preferred gave a better tone to the market and helped to repair the previous losses. Smelting gained 5 in all. Federal Mining rallied 3½, and New York Airbrake 2½, Locomotive rose 3½, Chicago Union Traction preferred 2½. Tennessee Coal, 2½. stocks swung both ways on a narrow range. Considerable Kansas & Texas pre
